mohammadanasnazimportfolio.netlify.app

Lahore, Punjab, Pakistan

Professional Summary:

Associate Full-Stack Web Engineer specializing in the MERN stack. Proficient in building dynamic React.js frontends, scalable Node.js/Express backends, and handling data modeling in MongoDB and Firebase. Proficient in React.js, JavaScript (ES6+), HTML, and CSS, with experience in developing component-based SPAs and integrating APIs. Focused on clean code, performance optimization, and user-centric design. Passionate about creating accessible, performant web interfaces that balance visual appeal with usability and maintainability.

Technical Skills:

Programming Languages: JavaScript (ES6+), HTML5, CSS3, Python, C++

Backend / BaaS: Firebase Authentication, Cloud Firestore, Node.js, MongoDB(basic), PHP/MYSQL(basic)

Frameworks & Libraries: React.js, React Router, Express(basic)

Styling & UI: CSS Flexbox, CSS Grid, Responsive Web Design, framer-motion, three.js

Web Development Concepts: Single Page Applications (SPA), Component-Based Architecture, REST APIs (learning), JSON, DOM Manipulation

Development Tools: Git (basic), GitHub, npm, VS Code, Chrome DevTools, Antigravity, Shopify, Wordpress

Deployment: Vercel / Netlify (GitHub-based auto deployment, HTTPS, Build configuration)

Technical Projects:

MedVision AI FYP Project (In Progress):

- Engineered a robust backend infrastructure using Node.js and Express to handle client requests, routing, and system middleware seamlessly.
- Integrated FastAPI to bridge the Node.js backend with an advanced custom Machine Learning model for automated bone fracture detection and localization.
- Utilized React.js alongside Three.js to deliver an immersive, interactive 3D UI, optimizing frontend rendering performance for dynamic assets.
- Uses firebase/firestore for Auth and storage
- Build a ML model for fracture Detection and Localization
- Build an other model for Fracture type Classification
- Integrate both of them with website

M&M Taxi (Taxi Service Business based in Georgia)

- Help the business in building a dynamic website
- Build a cost estimator to help customer get an estimated price
- Integrate dual theme toggle button to switch between light and dark theme

Real-Time Chat Application | React, Firebase, Netlify

- Developed a real-time chat app using React.js with reusable components and client-side routing
- Designed a NoSQL document schema for real-time messaging, managing CRUD operations and state tracking efficiently
- Added Firebase Authentication for user sign-up, login, and secure access
- Deployed the application on Netlify
- Designed a responsive interface ensuring mobile-first design and smooth user experience

ChatGPT Clone:

- Developed a ChatGPT clone using React.js with reusable components
- Implemented Firebase Firestore for real-time message storage and retrieval, including CRUD operations
- Added Firebase Authentication for user sign-up, login, and secure access
- Deployed the application on Netlify

Agency Website

- Developed a dynamic website for SEO and development services
- Uses React for Single Page Application
- Use CSS for Responsive Web Design

Education:

University of Lahore Punjab, Pakistan *Bachelor of Computer Science* (8th semester)

Relevant Coursework: Data Structures & Algorithms, Web Development, Software Engineering, Database Management Systems, Artificial Intelligence, Machine Learning, Operating System.

Certifications & Professional Development

NSCT Test: Got 96 percentile in National skill competency test conducted by collaboration of HEC and P@SHA.

Web Development and Microsoft Office Certification: Completed Web Development Course from Aspire College Ferozepur Road Campus covering HTML5, CSS3, Flexbox, CSS Grid, responsive design principles, and accessibility best practices (May 2022).
